To whom it may concern

9 November 2023

This letter serves to confirm that SFB Engineers (Pty) Ltd has recently manufactured two Orbital Filters for oil purification on frying lines at Supreme Processing (Germiston), mechanically and electrically installed the units, commissioned the filters and trained operators in the use of the filters. SFB Engineers also is the sole supplier of any spare parts as required for the filters.

The filters have greatly reduced the oil consumption on both frying lines by filtering residue from the oil during the 18 hour per day frying operation.

Both projects have been completed on time and the expected results were achieved. The projects have been paid in full and have been capitalized.

Kind Regards,

**Pr Eng Hermann Brelage**  
**Group Engineer**
